### Course Description

**MSMWHS212 - Undertake first response to fire incidents** is a nationally recognised course and covers the skills and knowledge required to undertake an appropriate first response to fire incidents in onshore and offshore situations/emergencies.

People working, operating or who regularly travel to an onshore or offshore hydrocarbon/petrochemical installation or facility or major hazard facility should undertake this competency.

### Potential Career Pathways

- Workers at or potentially exposed to fire hazards
- Fire Wardens
- WHS Officer
- Workers at hydrocarbon/petrochemical installations or facilities

### Course Fees

\$200.00

### Course Content

- Recognising and assessing fire situations, including the identification of different types of fires and fuels
- Determining appropriate actions according to procedures
- Evacuation
- Selection and use a range of first response fire-fighting safety equipment
- Application of defensive fire-fighting tactics and techniques
- Minimising the effect of a fire incident
- Communication methods during and post fire incident
