Harnessing the power of partnerships to Drive VET skills forward

Australian Skills Group has always worked with industry and community organizations to ensure curriculum is relevant and up-to-date, and that students are provided with opportunities for work-integrated learning experiences.

Today, partnerships with industry are the lifeblood of Australian Skills Group as we help to shape the future of education across Southeast Queensland and beyond.

VET provides pathways for all students, particularly those seeking further education and training, and those seeking employment-specific skills. Students should consider VET when developing their senior education and training (SET) plan or equivalent. This planning helps students structure their learning around their abilities, interests, ambitions, and map out what, where and how they will study during their senior schooling.

The benefits VET offers to students include:

- development of work-related skills that enhance employability
- access to learning opportunities beyond the traditional curriculum, including work-based learning
- pathways to further training, education and tertiary learning.
